# PREFACE

The 1989 edition of the **S**tatistical **A**bstract for **M**issouri (**SAM**) seeks to provide as much comprehensive and timely economic and demographic information about Missouri as possible.

This edition of **SAM** includes six new tables.

There are four new tables in the section on Population and Vital Statistics. They are: 1) Missouri Abortions by age, marital status and education, by race; 2) Missouri Resident Deaths by selected causes of death; 3) Missouri Perinatal, Infant, Fetal, Neonatal, Postneonatal and natural deaths by County with rate per 1,000 live births; and 4) Missouri Hospitals by County.

The Income, Employment and Prices section has a new table on Missouri Gross Product.

The Agriculture and Natural Resources section also has a new table on Missouri State Parks and Historical Sites.

The data in **SAM** is reported in as detailed a format as cost considerations allow. However, many of the data series are available in more detail and/or for longer time spans than is reported in **SAM** and will be provided upon request.

The B&PA Research Center would like to extend our thanks to various governmental agencies -- state, local and federal -- and to many private institutions, for their cooperation in providing much of the data in **SAM**.

The B&PA Research Center also prepares statistical tables for Missouri counties. Those tables in the Table of Contents marked with a ◘ can be purchased from the B&PA Research Center.

# F. ENERGY

## TABLE F-1

[1] Liquefied petroleum gases include ethane, ethylene, propane, propylene, butane, butylene, butane-propane mixture, ethane-propane mixture, and isobutane. The 199-1982 LPG data may not be directly comparable to the pre-199 data due to modifications to the LPG sales survey form and an updated sampling frame.

[2] Includes industrial and utility production, and net imports of electricity.

[3] Consumed at utilities to produce electricity.

[4] Net interstate sales of electricity is the difference between the amounts of energy in the electricity sold within a state (including associated losses) and the energy input at the electric utilities within the state. The net interstate sales, therefore, include associated electrical energy losses. A positive number indicates that more electricity (including associated losses) came into the state than went out of the state during the year; conversely, a negative number indicates that more electricity (including associated losses) went out of the state than came into the state.

**Note**: Totals may not equal sum of components due to independent rounding.

**Note**: Does not include wood consumed by the non-utility sectors. Also excludes small quantities of other energy sources for which consistent historical data are not available such as: (1) Solar energy obtained by the use of thermal and photovoltaic collectors; (2) Wind energy; (3) and geothermal, biomass, and waste energy other than that consumed at the electric utilities.

[2] Incurred in the generation and transmission of electricity plus plant use and unaccounted for electrical energy losses.

Note: Totals may not equal sum of components due to independent rounding.

Note: Excludes small quantities of other energy sources for which consistent historical data are not available such as: (1) Wood consumed as fuel in the residential sector; (2) Solar energy obtained by the use of thermal and photovoltaic collectors; (3) Wind energy; (4) and geothermal, biomass, and waste energy.

[1] Thousand short tons.

[2] Billion cubic feet.

[3] Thousand barrels.

[4] Million kilowatt hours.

[5] Liquefied petroleum gases include ethane, ethylene, propane, propylene, butane-propane mixture, ethane-propane mixture, and isobutane. The 199-1982 LPG data may not be directly comparable to the pre-199 data due to modifications to the LPG sales survey form and an updated sampling frame.
